Summary

Aspiring Software Developer with strong foundation in Java, C++ and Data Structures, with practical experience in Java-based application development. Skilled in Object-Oriented Programming, backend logic design, and SQL. Capable of building efficient software solutions and adapting quickly to new technologies.

Skills

Programming Languages: Java, C++, Python

Core Concepts: Data Structures, OOP, Problem Solving

Development: Java, React, HTML, CSS, JavaScript, VS Code, Jupyter Notebook

Database: SQL, MySQL

Tools: VS Code, Jupyter Notebook

Education

B. Tech in Computer Science and Engineering

Galgotias University, Greater Noida

Sept 2021 – June 2026 | CGPA: 8.29/10

Class XII: PCM | AMU Board | 2021 | 67.4%

Class X: AMU | 2019 | 70.83%

Experience

JAVA FULL STACK DEVELOPER INTERN — EduSkills (AICTE Virtual Internship)

- Completed a 10-week internship focused on Java-based application development and full stack concepts.
- Applied Object-Oriented Programming principles in building structured and modular solutions.
- Worked with frontend technologies alongside Java to understand end-to-end application flow.
- Strengthened backend logic design and real-world development practices.

TEAM LEAD — Technical Hackathon Event

- Led a team to final rounds among 25 teams in a multi-theme technical event.
- Developed a finance management system combining **Java UI** with analytical logic.
- Managed team coordination and system design.

Projects

DIGITAL FINANCE MANAGEMENT SYSTEM (JAVA, SWING)

- Developed a Java-based application simulating banking operations and transactions.
- Implemented OOP concepts: encapsulation, inheritance, modular design.
- Designed backend logic for transaction processing and validation.
- Built user interface using Java Swing.

NOTION-STYLE WEB APPLICATION (REACT, VITE)

- Built a structured note-management application with page-based navigation.
- Implemented dynamic rendering using React.
- Designed frontend-only architecture for performance and simplicity.

Certifications

- **HackerRank** SQL (Intermediate & Basic)
- **HackerRank** Python (Basic)
- **HackerRank** Problem Solving
- **SoloLearn** HTML & CSS
- **Oracle** Database Design

Coursework

Computer Organization & Architecture | Operating System | Computer Networks | Data Structures | OOP | DBMS
